

RAMID SUMS: 3 LEVELS

$7 + 11 = 18$

$3 + 4 = 7$

$4 + 7 = 11$

Start at the bottom and work up

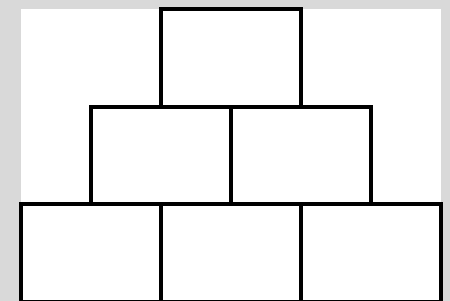

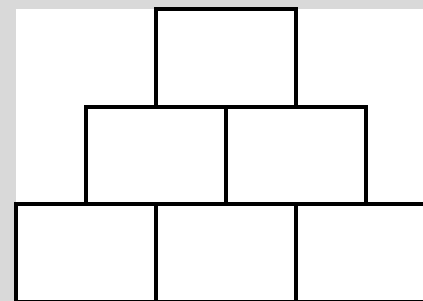

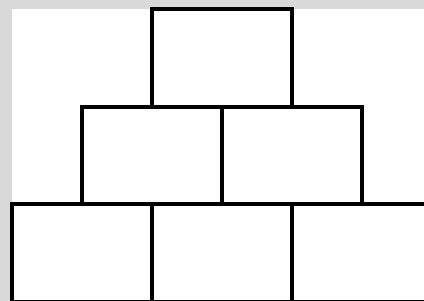

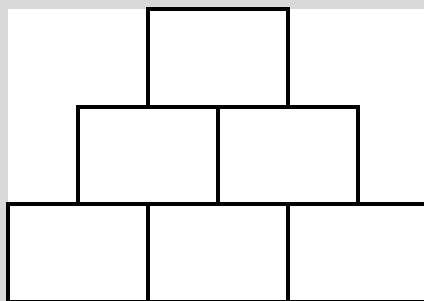

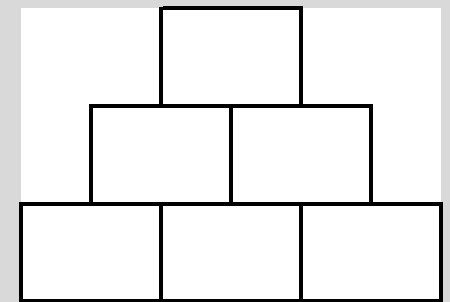

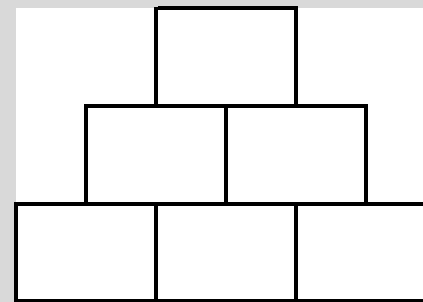

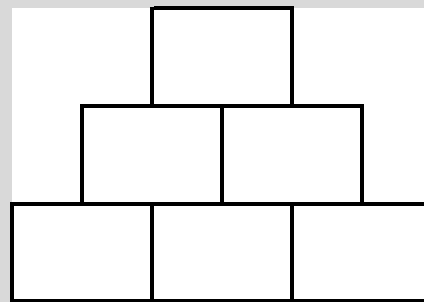

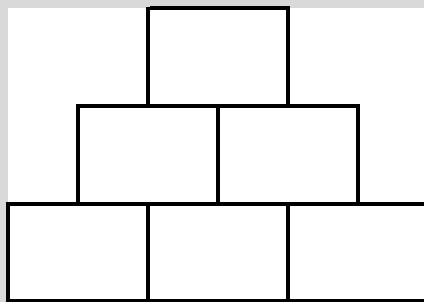

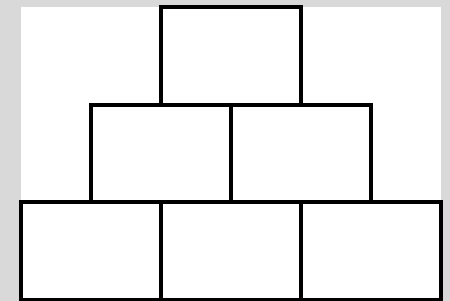

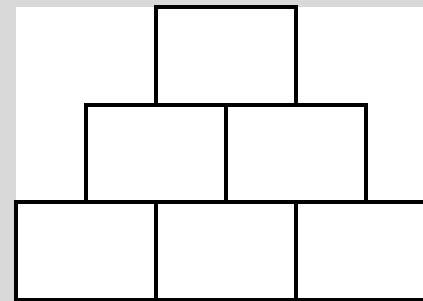

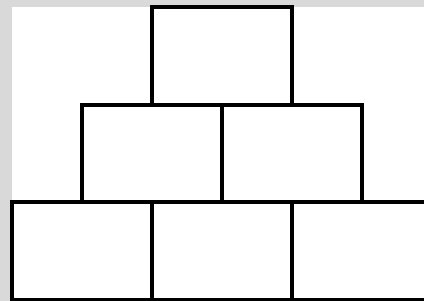

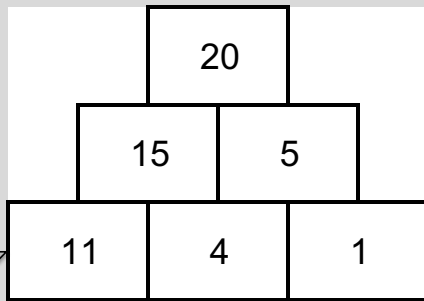

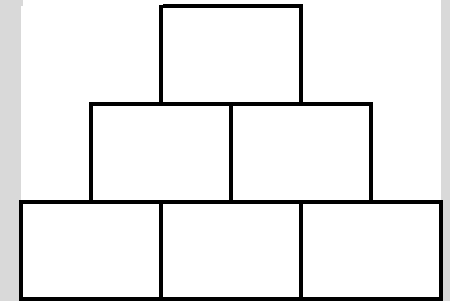

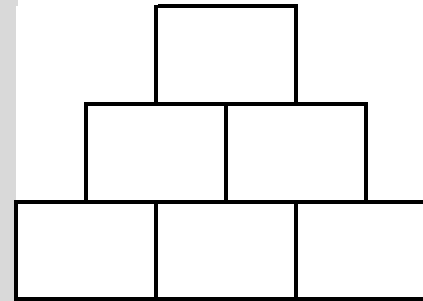

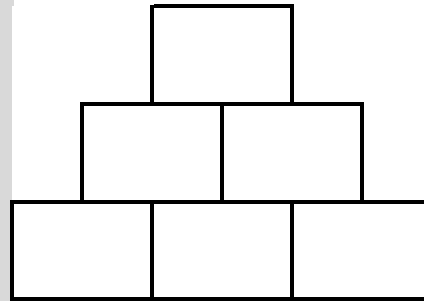

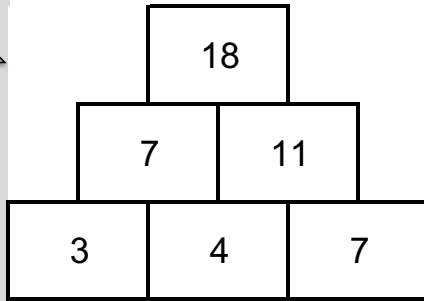

OR

Start at the top and work down

20 can be split into 15 and 5

5 can be split into 4 and 1  
 $15 - 4 = 11$

Now you try

<p><b>Ways to fill in numbers in the bottom of the pyramid</b></p>	<p>1. Roll 3 dice. Put one number in each box</p>	<p>2. Roll 2 normal dice. Roll a 1-20 dice. Put one number in each box</p>	<p>3. Close your eyes. Choose 3 random numbers from a 100 chart. Put one number in each box</p>	<p>4. Choose 3 random numeral cards. Put one number in each box</p>
<p><b>Ways to fill in numbers in the top of the pyramid</b></p>	<p>1. Roll 3 dice. Add them together. Put the number in the top box</p>	<p>2. Roll 2 normal dice. Roll a 1-20 dice. Add them together. Put the number in the top box</p>	<p>3. Choose 1 random number from a 100 chart that is bigger than 50. Put the number in the top box</p>	<p>4. Choose 1 random numeral card. Put the number in the top box</p>

PYRAMID SUMS: 4 LEVELS

$24 + 28 = 52$

$11 + 13 = 24$

$13 + 15 = 28$

$6 + 5 = 11$

$5 + 8 = 13$

$8 + 7 = 15$

Start at the bottom and work up

OR

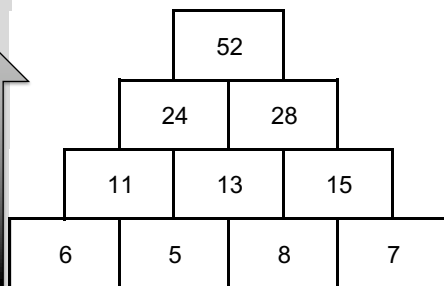

Start at the top and work down

20 can be split into 20 & 30

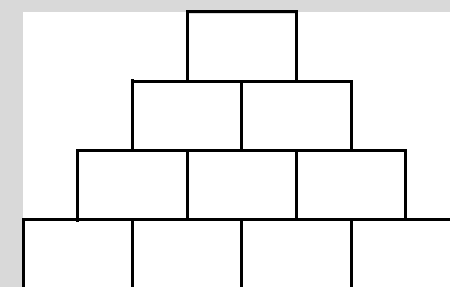

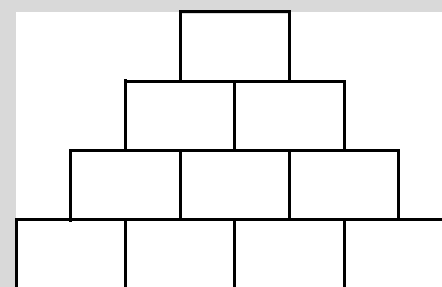

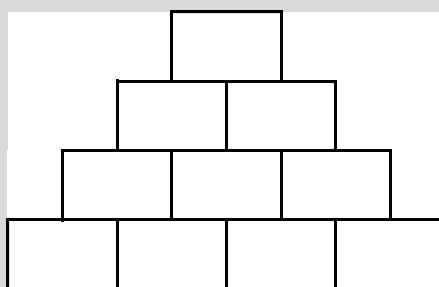

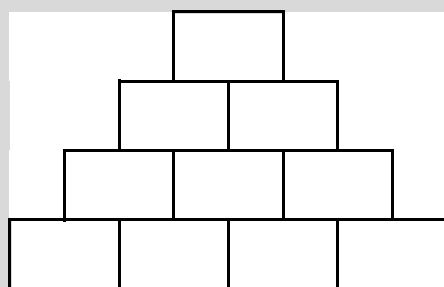

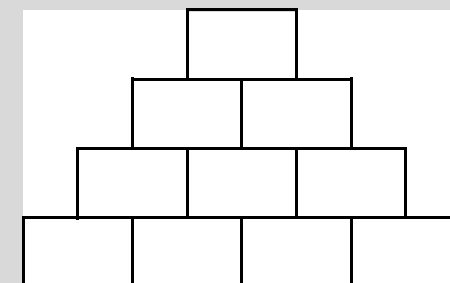

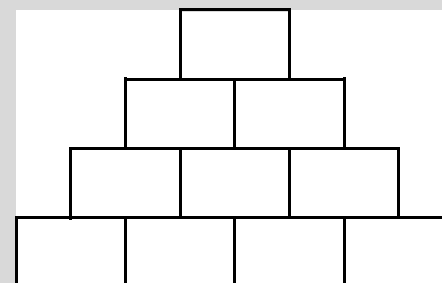

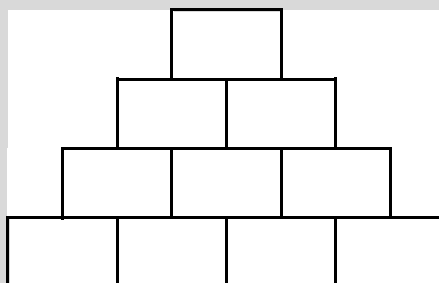

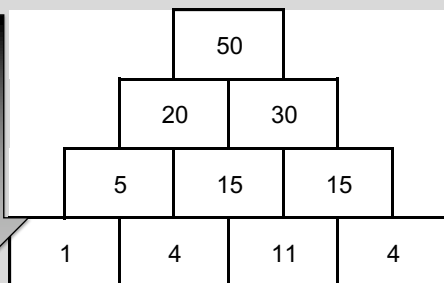

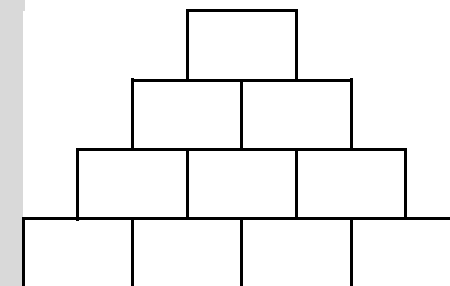

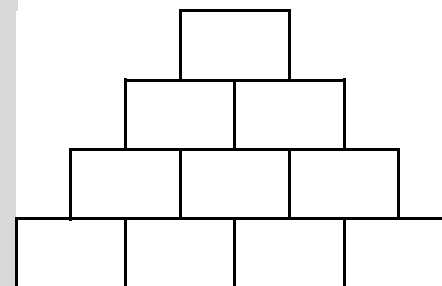

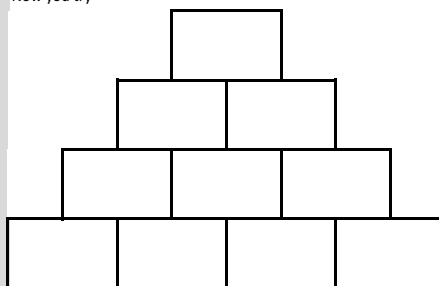

20 can be split into 5 & 15,

30 can be split into 15 & 15

$15 - 4 = 11, 5 - 4 = 1$

Now you try
